

## Find The Answer

The only place I want to be  
Is where your lies will set me free  
Like everyone I try to catch  
The last goodbye – it isn't much  
My voice have never been so clear  
I make it simple and it's fear  
That's stretching upon my broken soul

And now I'll try not to fall  
And now I will crawl  
And I will never let you down  
Cause when we miss  
We surely found

You change your mind every time we stand alone  
And I can't stand – I must be strong  
I hope we will find the answer  
But I won't get rid of this cancer  
You change your mind every fucking time  
And I can't stand to cross this line  
This fear is stretching upon my broken soul

And now I'll try not to fall  
And now I will crawl  
And I will never let you down  
Cause when we miss  
We surely found
